Did you ever wonder why there are some players who are greatly increasing their population that seems impossible to do?

Did you ever question how they manage to play like that even though the game is so young?

Would you ever believe that they made it less in than 48 hours?

The Wonders Lead To Questions...

I started to think about these questions since those cities that used to be my neighbors have greatly progressed in just a matter of time. Logically they may have spent real money for premium items? Which I also tried out of envy, but still the results are not the same and can't even make half of those neighbors of mine. The wandering prompted me to think and write in sharing this so called SimCity Social cheats. In all honestly I could still not explain the whole picture about it, I am only certain that there is something they know that we don't know. Yes maybe there are glitches, or there are already hacks that those players buffed their accounts with and the results are evident among many of my neighboring cities in the game.

The Questions Leads To Investigations...

As I started my investigation of this well known top-tier players, they are who already achieved 30,000+ headcount or population in their respective cities in just a day of playing the game.

In this little gum-shoe query of mine, I have discovered that one "tricky" way of pumping up you population is to complete the "UFO Crash Site" quest or build Landmarks. But bear in mind that theses task are very hard to complete if you not eager enough to burn some cash into the game although it is very rewarding since it could grant your city a 10,000+ residents (depends on how you place your structures too) by simply completing this task.

So we are not here in getting those things for our city. In my case I chose to have Gaia's Fountain. You need only to have 2500 Fame which very easy for me to manage since I can massively add friends and neighbors here. You don't need to spend materials or Simoleons but then the challenge is on the collectible items you should have and some staff that you need to ask. (If you have lots of neighbors this won't be a problem)

Basically you are required to have rare items that you can't ask from your friends. Of course you can buy it with diamonds but that are way expensive not unless you have a diamond hacks then that wouldn't be a problem for you. And those items which you can only achieve by visiting neighbors may sounds easy to do that but actually it would take a lot of time since you need first to have a high level of relationship for high percentage drop rate and don't forget the low energy refill on the side. But there's a shortcut.

Another Question Rise...

How? First you have only 5-8 bonus action in visiting friends every day after that you need to spend energy which is very limited. To acquire the highest drop rate in game, you should spend 300-500 energies and that is impossible to do in a single day. But don't you worry you are not alone in achieving this since the relationship meter can be boosted by both parties. Although another problem is if your friends are willing to spend 150-250 energies to accompany you in this task, or can you do that in one single day? Tricky right?

Let SimCity Social Cheats Be The Answer...

So here's now the SimCity Social cheats comes in. Having a little helping in most of the games we play in Facebook or not, it is apparent that it helped us to enjoy the maximum gaming experience of the game and this time it's on "SimCity Social". How to do so?

First, is to sign-up for a dummy account on Facebook. You need to fill it with tons of friends, again put your request here to gain lots of friend's requests easily. This dummy account is the one who will raise your relationship status until you reach the max level in which you can have 100% of drop rate of rare items.

Facebook login form with fields for Email or Phone (simcitysocialcheat) and Password (masked with dots). Includes a "Log In" button, a "Keep me logged in" checkbox, and a "Forgot your password?" link.

Facebook Sign Up form. Title: "Sign Up". Subtext: "It's free and always will be." Fields include: First Name (SimCity Social Cheat), Last Name, Your Email, Re-enter Email, New Password, I am (Select Sex dropdown), Birthday (Month, Day, Year dropdowns). A link "Why do I need to provide my birthday?" is present. A disclaimer states: "By clicking Sign Up, you agree to our Terms and that you have read and understand our Data Use Policy, including our Cookie Use." A green "Sign Up" button is at the bottom.

Note: Gaia's Garden has an item requirement that you can gather from positive relationship (Angel Halo Sign) thus I focus on building positive relationship and get rare positive items. I recommend having other dummy account that will boost a negative relationship in which you can have negative rare items such as wrath and fury easily.

In less than a day you can max out your relationship and enjoy 100% percent drop rate percentage, gather all rare requirements to create Landmark (Gaia's Garden) and it will add 10,000+ populations in your city.

Other Applications

Raising Upgrade Establishment at Ease...

This cheat will work not only on raising population but also in upgrading the components of your city. Later on if you have a big city you will find out that gathering rare items is one of your major problems thus it will lessen your capabilities to upgrade but with this "tricky" scheme getting those items is just a matter of clicking of a button with 100% drop percentage.

Extend Your Bonus Energy up to 8..

This cheat also can give you more bonus actions in visiting friends; from **Max** relationship you can have 8 extra bonus actions every day that can let you gather more Materials, Simoleons, Fame, Collectible items, and more.

Satisfy your Population Easily....

By increasing your relationship you can unlock more friend actions that will easily satisfy your population. This will help you to have more active population which is very efficient way to gather more resources for your city without spending energy. Of course we need to satisfy our population and sending them friendly action in order to make them appeased and could generate more gain for your city.

You don't need to burn cash...

By having this cheat, you don't need to spend diamonds to get those rare items. Many players tend to give up and buy those items with diamonds. With this you don't need to so, if you see that the required item can't be ask from your friends it might be available by visiting your friends which is way too old and slow without the help of this little tricky treat.

Build the biggest city ever with cheapest cost in game.

Since you know this cheat, can you now boost your Fame? OF COURSE! And that is FREAKIN AWESOME! Having the secrets of SimCity Social is now a click away, unlike "attractions" which generate population too which can be acquired by having Friends or Foes, these structures can only be bought with FAME.

But it will now be easier to attain those special items since you have boosted your FAME by using this tricky scheme in the game. A usual "attraction" item is very expensive and boost your population much lesser than items being bought by "Fame" and doing so is a lot easier employing this scheme. Remember to unlock more items in the game is to meet the minimum population requirement for the item and the very best way to do so, is to boost your fame and buy those "Fame items" and flood your city with a crazy amount of population.

Don't forget to share!

With this simple cheat you can have your dream city, without spending money for Diamonds. Please we are only asking you to share this to your friends, so they will be informed too and enjoy the benefit of this "trick" and that there are cheats like this existing on SimCity Social. You don't need cheat engine, Charles proxy and other third party software hence this is permanent and technically legal to use.
